In 1960, John Mauchline published a seminal work entitled 'The biology of the Euphausiid Crustacean, Meganyctiphanes norvegica (M. Sars)', which provided detailed descriptions of a number of characteristic traits of Northern krill, including diel vertical migration (DVM), feeding, growth mortality rates, maturation and the function of the luminescent organs. The study was carried out in the semi-enclosed Scottish loch, Loch Fyne (Clyde Sea), which offered ready sampling-access and the ...
