A parser function is a form of basic coding that happens within the MediaWiki language, wikitext. It allows you to make a template more robust and adaptable. Written well enough, a parser function definition produces different results in different situations. For instance, instead of simply repeating the same statement on every page where the template{{My Great Template}} is used, you can use ...

This thesis set out to explore the identities formed by members of online fandom communities, and to determine the ways in which those identities affect their real life, offline identities. This qualitative study encountered elements related to stereo types of young women who are fans of mainstream pop music, and provided insight on their experiences through interviews with five long time boy ...
