Welcome | IFSTA

Ensures that all rope systems have been safety checked by the Technical Safety Officer and Rigging Team Leader prior to operation. The RGL is the only person at a rope rescue incident who can initiate motion of the rope system or restart the rope system if stopped or re-set. (The RGL may delegate this function to the Entry Team Leader.)

Mountain Rescue organizations require a strong rope, but one that is lighter & easier to tie knots in than a heavy stiff 12.5mm rope that is more common with fire/rescue. Typically this is about a 11mm rope with an unknotted breaking strength of around 30kN. Dynamic ropes may be needed for lead climbing to get to patients, but rescue load

The International Fire
Service Training
Association (IFSTA) is a
group of fire service
professionals that

File Type PDF Ifsta Rope Rescue Manuals

improves firefighting tactics by providing educational resources. Instead of simply publishing educational materials that firefighters are known to use, the IFSTA publishes training manuals, study guides, workbooks, and other materials after it identifies a need for them.
