1990 AHSME Problems/Problem 25 Problem Nine congruent spheres are packed inside a unit cube in such a way that one of them has its center at the center of the cube and each of the others is tangent to the center sphere and to three faces of the cube.

1990 AHSME Problems/Problem 25 - Art of Problem Solving

Sometimes, problems just seem too impossible to solve, at first glance. Your creative problem-solving skills may be at a stand-still from time to time, and the interviewer wants to know how you deal with that. Taking a brief break and stepping away from the problem can help you to see things from a different perspective.

25 Problem Solving Questions (with Answers)

Summary. The three stages of the process for solving physics problems used in this book are as follows: Strategy: Determine which physical principles are involved and develop a strategy for using them to solve the problem.; Solution: Do the math necessary to obtain a numerical solution complete with units.; Significance: Check the solution to make sure it makes sense (correct units, reasonable ...

1.7 Solving Problems in Physics | University Physics Volume 1

The density equation is density equals mass per unit volume or $D = M / V$. The key to solving for density is to report the proper mass and volume units. If you are asked to give density in different units from the mass and volume, you will need to convert them.
